## DETAILED ACTION

### *Response to Amendment/Arguments*

1. Upon further consideration of the prior art, it is the Examiner's position that the claims should be rejected as obviousness-type double patenting over U.S. Patent No. 6,733,835, as set forth below.
2. It is noted that the terminal disclaimer filed on May 9, 2006 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of 6,753,038 has been reviewed and is accepted. The terminal disclaimer has been recorded.

### *Double Patenting*

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 1762

4. Claims 1, 3-18, 30, and 32-42 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-6 of U.S. Patent No. 6,733,835.

Although the conflicting claims are not identical, they are not patentably distinct from each other because the assembly atoms and crosslinking atoms of U.S. Patent No. 6,733,835 form a self-assembled monolayer. Further, it would have been obvious for one having ordinary skill in the art to have performed the method of U.S. Patent No. 6,733,835 under the claimed pressures because the claimed pressures are necessarily achieved using a supercritical fluid.

#### ***Allowable Subject Matter***

5. Claims 1, 3-18, 30, and 32-42 would be allowable over the prior art if the obviousness-type double patenting rejections set forth above are overcome. The claims are allowable over the prior art for the reasons discussed in the prior Office actions.

#### ***Conclusion***

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kirsten C. Jolley whose telephone number is 571-272-1421. The examiner can normally be reached on Monday to Wednesday.
